HIGH QUALITY REFRACTORY SOLUTIONS

Active Refractories, established in 1974, is a leading manufacturer and supplier of Fire Clay & High Alumina Bricks and other refractory products. Our range includes Fire Clay Bricks, High Alumina Bricks, Castables, and Basic Bricks used in construction, glass industries, power plants, steel plants, and various non-ferrous industries. We ensure strict industry standards, using high-quality raw materials sourced from reliable vendors. Our advanced infrastructure and skilled team allow us to maintain flawless production. With consistent quality and dedicated service, we have earned the trust of a large customer base.

OUR PRODUCTS

MONOLITHIC REFRACTORY

Refractory Castables have extremely high strengths and volume stability at all temperatures up to their maximum operating temperature. Designed with proportions of alumina cements and carefully controlled grains and micro fine sized aggregates. These are hydraulic setting castables which need to be installed under controlled condition.

INSULATION REFRACTORY

Refractory products are specially engineered to resist extremely high temperatures while maintaining structural strength and stability. These materials are essential for insulation and protection in industrial boilers, furnaces, kilns, and other high-temperature applications. They help improve thermal efficiency, reduce energy loss, and extend the service life of industrial equipment.

REFRACTORY GATING SYSTEM

We manufacture complete line of Refractory Gating System and are the topsuppliers in India. The Refractory Gating System offered by us, includes Pouring Cup, Sleeve, Junction, Tee, Bend, Runners & Funnel. The system is made up of excellent quality materials that ensure proper flow of the molten metal into moulds without any refractory inclusions. The Refractory Gating System is available in varied sizes (Inner Dia. 30 mm to 90 mm) and dimensions as per the customer's requirement.
